

## BELLEVIEW STATE PRESCHOOL

### PROGRAM PHILOSOPHY

Welcome to our family community of children, families and staff. We hope that you will share in our passion of making a positive difference in the lives of children.

Together at Belleview Preschool we view children as individuals, recognizing the various backgrounds and developmental levels in which they present. We value and share our roles of modeling, guiding and providing relationship-based care. In doing so, together we are able to nurture and enhance positive child development in a safe caring environment. Teachers work together in planning and carrying out age appropriate learning opportunities for children to actively play, learn and grow in all areas of their development. We support and provide a variety of learning choices so that each child's learning preferences can be individually fostered. Every child in our program will have opportunities to engage in play that is focused on cognitive, social/emotional, math, science, literacy and physical health development.

Belleview Preschool staff respect and value each individual child and family culture. When working with children and families we stay focused on best practices and the National Association for the Education of Young Children (NAEYC) code of ethics. Please feel comfortable coming to us with your concerns, questions, ideas, suggestions and advice. We are a team and value your input!!
